WASTE DISPOSAL

The Taste of Lake Forest will implement waste disposal regulations in compliance with California Senate Bill 1383 (SB 1383). SB 1383 is a California law that mandates significant reductions in methane emissions, a potent greenhouse gas, by diverting organic waste to recycling and composting facilities.

How Does SB 1383 Apply to the Taste of Lake Forest Event?

As a participant in the Taste of Lake Forest event, you are required to adhere to SB 1383 regulations regarding organic waste disposal. During and after the event, organic waste bins will be provided for your use. These bins are designated for the disposal of food waste, compostable utensils, napkins, and any other organic materials generated during the event. The image below demonstrates the bins that will be available for vendor use throughout the duration of the event.

What You Need to Do:

Separate Organic Waste: Dispose of all organic waste generated by your business into the designated organic waste bins provided at the event.

Follow Instructions: Follow instructions provided by event staff and volunteers regarding organic waste disposal. They will be available to assist you with proper waste separation and disposal.

Dispose Properly: Minimize contamination by ensuring waste is placed in the proper designated bins. It is strongly encouraged that businesses use compostable or biodegradable servings utensils, plates, napkins, dining utensils, and cups (which can be disposed of in organic waste bins) to reduce contamination.

Compliance is Key: Adherence to SB 1383 regulations is mandatory for all participants.
