

City Portola Hills Update, July 10

- The orange construction signs directing residents to the City's Portola Hills Soil page, <https://bit.ly/PortolaSoil>, was taken down Friday afternoon. The City put the sign up for a week because some residents were unaware of the information on the website.
- Excavation activities this week seemed to generate a weaker, if any, odor. Because of that, excavation on Saturdays has stopped, in hopes residents can enjoy the outdoors during the warmer weekends.
- If you experience an odor, please notify the Air Quality Management District, <https://www.aqmd.gov/home/air-quality/complaints>
- The City continues to work with Baldwin to ensure the soil issue is mitigated as quickly as efficiently as possible. Residents' health and safety remain our top concern.
